

Press Release Quick Tips

VCC's New Flexible Light Pipe Features Anodized Aluminum Body For Superior Protection Against the Elements

Distribution Date: March 30, 2015

Product Name: FLXR Series litepipe™

Product Description: The flexible NEMA 4-rated FLXR Series litepipe is designed for harsh and outdoor environments

Key Markets/Applications:

- | | | | | |
|---|-----------------------------|----------------------|-----------------------|-----------------------------|
| • Aviation equipment | • Electrical control panels | • Instrument panels | • Outdoor signage | • Transportation dashboards |
| • Disinfection & sterilization environments | • Industrial machinery | • Military equipment | • Safety applications | • Vending & gaming machines |

Key Benefits:

- Robust anodized aluminum body delivers NEMA 4 protection from the elements
- Optical core ends are polished to ten microns for optimal light transmittance
- ESD protection and resistance to shock and vibration
- Low profile affords anti-vandalism defense
- Wide viewing angle maximizes light detection

Product Specifications:

- 0.400" (10.1mm) mounting hole
- Available in standard lengths ranging from 4.0" (101.6mm) to 12.0" (304.8mm)
- Custom lengths are available
- Wide variety of lens colors and two different finishes to meet most any application requirement
- Can be used with surface mount or thru-hole LEDs
- Three LED connection options using SMD 22, THR 22 and THR 5 22 connectors (order separately)
